

Deluxe Water Test Kit

The Water Test Kit has been designed to measure the water content of fluids such as lubricants, oils, fuels, and solvents. A small quantity of the fluid to be tested, along with a dry solvent, and calcium hydride are placed in to the vessel. The calcium hydride reacts with the water, producing hydrogen gas. The pressure displayed on the gage is proportional to the % or PPM of the water present in the sample. The gage can display water content from 10 to 120,000 PPM over

five ranges. Higher water content can be determined by following the procedure found in the instructions. The Water Test Kit is manufactured in the U.S. using high quality anodized aluminum and a precision pressure gage. A manual pressure relief valve is incorporated to enhance accuracy and safety. Test results are available in five minutes. Use The Water Test Kit in the field or in the laboratory. It is portable and easy to use.

Part # 01-WTK-DELUXE

Part # 01-WTK-WATERSB (Vessel Only)

Ranges	Resolution	Acc. $\pm 2\%$ F _{ull} S _{cale}
A. .15% 1,500 PPM	.001% 10 PPM	$\pm .003\%$ ± 30 PPM
B. 1.50% 15,000 PPM	.01% 100 PPM	$\pm .03\%$ ± 300 PPM
C. 3.0% 30,000 PPM	.02% 200 PPM	$\pm .06\%$ ± 600 PPM
D. 6.0% 60,000 PPM	.04% 400 PPM	$\pm .12\%$ ± 1200 PPM
E. 12.0% 120,000 PPM	.08% 800 PPM	$\pm .24\%$ ± 2400 PPM

For higher ranges up to 50%, refer to the instruction manual.
